

Outsourcing Initiatives at HAL

HAL has initiated outsourcing of several potential work packages in the following areas:

- **Design and Development**
- **Manufacture of Detail parts, Sub-Assemblies & Assemblies**
- **Electrical looms, relay boxes etc.,**
- **Tooling, Jigs & Fixtures etc.**
- **Painting, De-painting, Cleaning, tailoring activities etc.,**
- **Inspection and other service activities**
- **Routine Repair and maintenance activities at outstation bases such as periodic maintenance, Break down repairs and snag rectification etc.**
- **Testing/ Inspection of parts manufactured / repaired and follow up with sub Contractors.**

To provide the necessary impetus & direction to out-sourcing, the existing Outsourcing Departments in the Divisions have been developed as being capable of performing all required functions.

Supply chain development to outsource the identified task, operation, job or process, ensuring timely availability of components, part, or assembly for production program or project implementation.

Establishment of specialized groups for vendor development, technical co-ordination, commercial transactions, logistics handling, quality assurance and financial vetting & support.
