85	25/I-SER/9	27-09-2025	Design Analysis & Schematic Optimization for Rotor Warning Unit	M/s Rajiv Gandhi Institute of Petroleum Technology (RGIPT), Amethi	The subject service "Design Analysis & Schematic Optimization for Rotor Warning Unit" is proposed from Academia i.e Rajiv Gandhi Institute of Petroleum Technology (RGIPT) , Amethi on Single tender/Nomination Basis in view of points as follows;•RGIPT possess relevant tools like Silvaco TCAD, Virtual ECU Offline Simulator and OrCAD for carrying out the activity.RGIPT, Amethi is a premier Institution of National Importance under Ministry of PNG with a focus on education and research.A MoU has also been signed between HAL& RGIPT, Amethi.HAL has successfully completed following projects with RGIPT, Amethi; 1. Emergency Location Transmitter Antenna Testing 2. Computation of Impact on DBAU Falling - conservative estimation of possibility of rupture. Considering above, service order for Design Analysis & Schematic Optimization for Rotor Warning Unit was awarded to M/s Rajiv Gandhi Institute of Petroleum Technology (RGIPT), Amethi on single tender/nomination basis.	Non-Project
86	PI06AMC577	28-07-2025	Scrap disposal etc.(2025-26 & 2026-27)	M/s MSTC Ltd.(Govt. of India Enterprise.) MSTC Jeevan Vikas Building 30-31A, Asaf Ali Road New Delhi-110002 India.	The RFQ was sent to M/s MSTC Ltd. Lucknow on Single Tender Nomination basis with due date 31/01/2025. Vendor submitted their quotation after due date, which was opened after obtaining approval from competent authority.TEC has accepted the offer from M/s MSTC Ltd. Lucknow.The vendor has quoted service charges rate @3% of disposed value item & GST(as applicable). The offer of service charges is compared with previously service charges and annual escalation works out to be NIL and vendor also confirmed in quotation that they agree to the previous terms and condition of prior agreement. Single offer approval obtained and proposal is processed,in view of above the same is considered reasonable for placement of order.	Non-Project
87	PI06AMC585	28-07-2025	ETP Sludge disposal for Electrical Maintenance Department Task year 2025-26.	M/s RE- Sustainability Limited, Plot No.672, on NH Road,Kumbhi Akbarpur Kanpur Dehat-209101 (U.P.)	The RFQ for ETP Sludge disposal was sent to M/s RE-Sustainability Limited, Kanpur on Single Tender Nomination basis with due date 07-03-2025. Vendor has submitted the quotation after due date. Therefore,it is treated as late,which was opened after taking approval from competent authority.TEC has accepted the offer from vendor.The hazardous waste generated out of ETP plant is to be treated as per norms of U.P. Pollution Control Board it is the authorized agency of UPPCB for disposal of hazardous waste in U.P. Proper disposal of hazardous waste is a statutory requirement under pollution control norms. HAL, TAD having a membership with UPWMP since 2nd March 2009 and HAL TAD deposited security deposit against above membership Rs.10000.00 in 2009.Single offer approval obtained and proposal is processed,in view of above the same is considered reasonable for placement of order.	Non-Project
88	10-25/23	14-07-2025	Proficiency testing of electro technical parameters as per NABL163	M/s. FARE Labs Private Limited, Gurgaon	Only companyin India providing PT service for all 5 parameters required for MIS STD LABas per PT plan of year2025.For convenience in execution, single vendoris decided. For small amounts, placing orders on different vendors, will take time and difficult in execution	General

Sl. No.	Purchase Order (PO) No.	PO Date	Description of the Items	Name of the vendor & Country/place	Brief justification/ Reason for placement of order on single tender /source basis	Project
117	30541454	18-08-2025	Design & Development	Foundation for Science Innovation and Development-Indian Institute of Science	The development of Artificial Intelligence-based Computer Generated Adversary for Enhanced Combat Training is a complex activity involving development of AI based Self learning Deep Reinforcement neural network models for learning the pilot combat manoeuvres and their real time execution in the simulator environment. This domain is a very niche area and it requires extensive domain expertise and knowledge of AI based algorithm development techniques. Indian Institute of Science (IISc) Bengaluru is India's one of the premier academic institutes. The Artificial Intelligence and Robotics Lab (AIRL) at the department of aerospace engineering was/is engaged in critical defence projects with multiple defence labs. IISc comprises of eminent academicians who have done research and have expertise in the areas of Artificial intelligence in particular AI/ML HAL has signed a Memorandum of Understanding (MoU) dt. 1710212017 with IISc for various new and breakthrough technologies in aerospace domain. Hence, based on the expertise and credentials of the institute, it has been recommended for tendering the requirement to IISc, Bengaluru on Single Tender basis	Development of AI based CGA
118	30541467	24-09-2025	HIRING OF A TAXI UP	VIVEK ENTERPRISES	a) The current proposal is based on the tender issued and finalized by Air Force Station, Gorakhpur. The tender was issued on Open tender basis vide GEM Bid No. GEM/2024/B/5590806 Dated 30-12-2024 by AFS Gorakhpur. b) M/s. Vivek Enterprises, Peepal Dada, Khorabar URF Sooba Bazar, Kunraghat, Gorakhpur, Uttar Pradesh is the vendor finalized by Airforce Station, Gorakhpur through competitive bidding and GeM Order was placed for their official movement. c) Since our employees are required to move inside AFS Gorakhpur and already contract is finalized by IAF through GeM and also considering the short term requirement of the Division, it is felt appropriate to place the PO on the same vendor.	FBFMS FOR JAGUAR DARIN III
119	AE25P511002	29-07-2025	CFD Analysis of HPC 5th stage using large eddy simulation(LES)	FOUNDATION FOR SCIENCE INNOVATION AND DEVELOPMENT, INDIAN INSTITUTE OF SCIENCE, BENGALURU	AERDC, HAL has done CFD ANALYSIS using RANS based simulation. As per the expert review, RANS based simulation is not adequate to capture the flow physics for the highly loaded transonic compressor design. Large Eddy simulation technique (LES) will help in predicting the true flow phenomena undergone uncaptured through RANS based simulation. LES analysis is a computationally intensive process that warrants high performance computing facility and expertise to model the complex flow. IISc is equipped with necessary infrastructure and know-how for LES Simulation	HTFE-25 project

Details of Orders placed on Nomination/ Single Tender basis for the period Jul' 2025 to Sep' 2025

Sl. No.	Purchase Order (PO) No.	PO Date	Description of the Items	Name of the vendor & Country/place	Brief justification/ Reason for placement of order on single tender /source basis	Project
120	AE25P511003	15-09-2025	Bearing Testing for stiffness estimation	NATIONAL AEROSPACE LABORATORIES, BANGALORE	Facility for carrying out bearing stiffness is not available in AERDC. CSIR-NAL is equipped with necessary infrastructure and Know-how for validation. The Advanced Bearings & Rotor Dynamics group of propulsion Division, CSIR-NAL, has established the National Test Facility for Rolling Element Bearings which has been utilized for static load test on qualification of tapered roller bearings for LCA Landing Gear application. It has also been used to carry out the static load test for rolling elements such as steel balls. In another work, the facility is used to carry out static load capacity of ceramic balls. With this background, it is inferred that the Advanced Bearings & Rotor Dynamics group of the propulsion division, CSIR-NAL, has vast experience in executing the projects related to the performance evaluation of aerospace quality bearings.	HTFE-25 project
121	AE25P511004	20-09-2025	Experimental Investigation and Numerical Modelling of shallow scratches and surface roughness effects on the fatigue life of Aero Engine Components	ICSR IIT MADRAS, CHENNAI	Shallow Scratches and surface roughness impacts the fatigue life of the components. Shallow scratches are common in aero engines. Shallow scratches happen during manufacturing, assembly and operation. It is necessary to evaluate the effects of shallow scratch and surface roughness on the fatigue life of aero engine components. Commercial finite element tools are not able to predict realistic stress and strain levels at these zones required for the evaluation of fatigue life and this necessitates extensive testing to estimate the fatigue life. Hence, a need has arisen to develop numerical model and validate the effects of shallow scratches and surface roughness on fatigue life of aero-engine components. The development of a numerical model with the capability to predict the fatigue life of an aero engine component with shallow scratch and surface roughness will enable to arrive at the realistic life. Facility for developing of numerical model and validation by testing is not available in AERDC, HAL. IIT Madras is equipped with necessary infrastructure and know-how for numerical modelling and validation.	HTFE-25 project

126	25DCWO1/6	29-07-2025	Qualification tests on Emergency Undercarriage Selector (P/No. 102800000) for LCA. Following test to be carried out:- 1) Combined Endurance and Impulse Test, 01 No. 2) Altitude test as per MIL-STD-810F, Method 500.4, Procedure II, 01 No. 3) High Temperature Storage Cum Operation Test (Diurnal test) as per MIL-STD-810F, Method 501.4, 01 No. 4) High Temperature Test, 01 No. 5) Low Temperature Storage Cum Operation Test as per MIL-STD-810F	M/s CENTRAL MANUFACTURING TECH INSTITUTE, BANGALORE	CMTI is an autonomous R&D Institute under ministry of Heavy Industries and Public Enterprises, Govt. of India and has established competence in the field of qualification testing of Actuators. CMTI has established high pressure test rigs, high temperature endurance facility and special functional mode test facilities for carrying out qualification testing of Hydraulic LRU's in operation condition. In LCA Emergency Undercarriage Selector, qualification tests are to be done in functional mode for which requisite facilities and expertise are not available with ASERDC, HAL sister divisions and other workcentres. These qualification tests need special test rigswith electrical connection and mechanical Accumulator for hydraulic pressure sourceand other aligned facilities for heating hydraulic fluid & simulating functional mode. Since CMTI has the requisite test facilities, expertise and also successfully conducted qualification tests ofsimilar nature in other aerospace actuators like LCA FCS actuators, ALH MRA &TRA etc. Thus, considering CMTI expertise in this domain, availability of test facilities and nature of stringent testing in LCA Emergency Undercarriage Selector, It is proposed to carry out Emergency Undercarriage Selector testing at M/s. 148	GEMC-511687739	10-07-2025	Repairing of B-Axis Rotary Table Motor of Tajmac Make CNC Blade Milling Machine of Sukhoi Engine Division.	M/s Sri Sanari Electrical & Engineering Works, Visakhapatnam	The B-Axis Rotary Table motor for Tajmac make CNC Milling machine, Model: H50 had been found faulty and needs to be repaired on priority to make the CNC machine serviceable. The OEM authorized vendor in india, M/s C P Agencies regretted for repairing of the defective motor. Possibility of repairing of the motor had also been tried through known vendors, but they also regretted for repairing of the same due to hardware complexity, as the said motor was used for the rotation of B-axis in CNC m/c to retain the accuracy of 10μ during the blade milling operation. However, M/s Sri Sanari Electrical & Engineering Works, Visakhapatnam had accepted for trouble shooting and repairing of the motor. Accordingly vide approval of competent authority, the motor was sent to the vendor. After testing, the vendor had submitted his offer for repairing of the motor. Considering the urgency of the machine towards production schedule and regretting of other known sources, the proposal for single tender nomination basis had proposed.	AL31FP

Sl. No.	Purchase Order (PO) No.	PO Date	Description of the Items	Name of the vendor & Country/place	Brief justification/ Reason for placement of order on single tender /source basis	Project
149	GEMC-511687778	18-07-2025	Calibration of 7 Nos. of Rockwin- Kral Make PD Type Flow Meters of Test Equipment for 4030A unit of Sukhoi Engine Division	M/s Fluid Control Research Institute, Palakkad, Kerala	Against the Order no. HBS/17Q3I-1029-98 dtd. 18.11.2017, the rig (equipment for testing of 4030A unit of GTDE) was received on 09.11.2021 from the vendor "M/s. Hydac (I) Pvt. Ltd., Coimbatore". The vendor had successfully commissioned and trialed on the equipment on 05-02-2022. According to DDPMAS the specifications of test rig had to be approved by RCMA & to be accepted by DGAQA before taking in to consideration for production use. The RCMA approval was already taken before execution of the test rig, whereas the DGAQA acceptance is still pending. For this purpose, this rig had to be calibrated before offering to DGAQA. Since this rig was commissioned & accepted by HAL on 05-02-2022, their onwards the calibration of the instruments are never done. All instruments can be calibrated at HAL itself except the 7 nos. of flow meters (make: Rockwin-Kral) which will be done by external agency who are NABL/ ISO certified. Hence, it is proposed for provisioning of service for calibration of above 7 nos. flowmeters of 619 shop of SED from M/s. Fluid Control Research Institute, Palakkad which is under the Ministry of Heavy Industries, GOI.	AL31FP
150	GEMC-511687720	29-08-2025	Calibration of Flow Meters and Rotameters Installed on various Test Rig of Overhaul Assembly Hangar of Sukhoi Engine Division	M/s Fluid Control Research Institute, Palakkad, Kerala	Different types of rigs has installed in OAH-720 to carry out functional check of modules in assembled condition. These checks were done in medium with air/gas, kerosene and oil. Some of them having rotameter were used to monitor the joint condition/air-leakage during actual assembly of different modules like turbine-cooling control, air to air heat exchanger, ignition device so that no leakage/partial leakage can be ensured as per technological limit. Others were used to measure the flow-rate through nozzles of different oil-jet/manifold and in case of not obtaining the same as per standard of technological specification are corrected accordingly with rework. Oil-flow ensures the proper lubrication and cooling of transmission and gear-box bearing in engine during exploitation which in turn affects the performance of aircraft. Improper lubrication may results in catastrophic failure of engine hence accurate consumption of oil from manifold at specified temperature and pressure can be ensured with calibrated flow-meter only. The equipments were critical in nature and periodic calibration was mandatory as per quality control procedure. The facility for Calibration was not available in Koraput. Considering criticality in nature and requirement of periodic calibration at trusted vendor/source, it was proposed to carry out the calibration at FCRI, Pallakad.	AL31FP
151	HBS/ 25SBI-1031	31-07-2025	Outsourcing of 08 types of electrical looms (30 Engine sets each)	M/s NAINI AEROSPACE LIMITED, UPSIDC INDUSTRIAL AREA, PO: TSL, NAINI, PRAYAGRAJ 211010	As per MoU between HAL and NAEI	AL31FP
